Subject comments on Gunnison

Hi Al -

See attached. If you put the view to "original showing markup", the edits in the text should show up. I had no luck with balloon comments, however. I have not repeated my comments from the first 35 pages in this document.

Unfortunately, time has not allowed me to do the thorough read you folks deserve. I ended up skimming a lot of the individual Factor A population stuff, catching only what popped out at me. A summary table of that stuff would be helpful if DC and the FR will allow. I also only briefly skimmed the Federal regulations section under Factor D. Pat Melhop and I talked about it awhile ago, and she decided to leave it as is from the greater finding. Since that's the version DC likes, and it passed DOI, I didn't touch it.

I think it looks good, but needs a bit of tweaking to make it a bit more "defensible". Please take my comments in that sense. After reading this, I think we are definitely making the right call.

Have a good weekend. Don't spend too much of it in the office! Thanks for the lookie lou!

Pat
